PROFESSIONAL SUMMARY

Junior Full Stack Developer with a backend focus, working with Django REST Framework, PostgreSQL and Next.js. I build the parts that must not break: tenant isolation, role-based permissions, and concurrency-safe invoicing and stock, backed by automated tests and CI. Looking for my first role on a development team.

TECHNICAL SKILLS

Frontend: JavaScript, TypeScript, React, Next.js, Tailwind CSS
Backend and data: Python, Django, Django REST Framework, Node.js, REST APIs, PostgreSQL, MySQL, SQL
Testing and tools: Playwright, Django testing, CI/CD with GitHub Actions, Docker Compose, Git, Linux

FEATURED PROJECTS

Fracxion · Multi-company business management

Sep 2026 – Oct 2026 · Personal project · github.com/nelsonvis3/fracxion-facturador

- Built customer, catalog, invoicing, payments, purchases and inventory modules, with per-company data isolation and five role-based permission levels.
- Used PostgreSQL transactions and row-level locks to keep invoice numbering and balances correct under concurrent requests.
- 367 backend tests (92% coverage) and 53 Playwright scenarios, run in GitHub Actions.

Ragnar Suplementos · E-commerce store

Aug 2026 – Sep 2026 · Commissioned by a local business · github.com/nelsonvis3/ragnarsuplementosfsa

- Built the storefront and an owner admin panel (catalog, bundles, stock, orders) with Next.js and a Django REST Framework API that owns prices and stock.
- Prevented overselling with row-level stock locking, including bundles that share inventory with products, and made checkout safe against duplicate requests.
- Integrated Mercado Pago with server-side payment confirmation and prepared a Docker Compose and Nginx demo on Ubuntu Server. 106 backend tests.

SPACE Tasks · Open-source productivity app

Oct 2026 · Personal project · github.com/nelsonvis3/space-tasks · Live demo: nelsonvis3.github.io/space-tasks

- Built a task, calendar and PDF-reader app with React, TypeScript and Node.js (built-in SQLite), released as a web demo and a Linux AppImage (Electron).
- Implemented accounts with scrypt hashing, CSRF protection and rate-limited auth, plus on-device AI, OCR and translation.
- 87 unit and Playwright tests on Chromium and Firefox, run in GitHub Actions.

EDUCATION AND CERTIFICATIONS

CS50's Web Programming with Python and JavaScript — HarvardX / edX · Sep 2026 – Present

Front End Development Libraries — freeCodeCamp · Certified, Aug 2026

High School Diploma — E.P.E.P. No. 179, Formosa · 2023

LANGUAGES

Spanish: native · English: intermediate (B1)
