Portfolio: nelsonsivisstum.vercel.app

PROFESSIONAL SUMMARY

Self-taught Junior Full Stack Developer with hands-on experience building complete web applications. Focused on JavaScript/TypeScript, React, Next.js, Python/Django, and PostgreSQL. Implemented authentication, access control, REST APIs, data modeling, and integrations with external services. Seeking my first professional opportunity to contribute and grow within a development team.

TECHNICAL SKILLS

Frontend: React, Next.js, TypeScript, JavaScript, Tailwind CSS

Backend and databases: Python, Django, Django REST Framework, REST APIs, PostgreSQL, SQL

Testing and tools: Playwright, Django testing, GitHub Actions, Docker Compose, Git, Linux

FEATURED PROJECTS

Fracxion | Multi-tenant business management

Repository: github.com/nelsonvis3/fracxion-facturador

- Developed client, catalog, internal invoicing, and payment modules with tenant data isolation and role-based access control.
- Implemented PostgreSQL transactions and row-level locking to prevent duplicate invoices and payments exceeding balances under concurrent requests.
- Executed over 360 Django tests and 50 end-to-end tests with Playwright, developed with Codex assistance and automated through GitHub Actions.

Ragnar Suplementos | E-commerce store

Repository: github.com/nelsonvis3/ragnarsuplementosfsa

- Migrated the store to Next.js and Django REST Framework, centralizing pricing, inventory, and order management in the backend.
- Integrated Mercado Pago with payment verification and transactional stock reservations to prevent overselling, including product bundles.

RoadLedger | Truck trip planner

Repository: github.com/nelsonvis3/ELD-trip-planner

- Built a React and Django application to calculate routes, required stops, and printable daily logs based on available driving hours.
- Integrated Photon and OSRM for geocoding and routing, with 12 tests covering validation, API contracts, and midnight transitions.

EDUCATION & CERTIFICATIONS
