SELECTED PROJECTS

Fracxion | Multi-Tenant Business Management & Internal Invoicing | Next.js, TypeScript, Django/DRF, PostgreSQL

- Built a multi-tenant platform for customer, product, internal invoice, payment, and audit management with role-based permissions.
- Developed REST APIs, tenant-level data isolation, secure sessions, and transactional invoicing and payment workflows.
- Validated with 216 backend tests (91% coverage) and 15 Playwright scenarios, based on documented local test results.

Ragnar Suplementos | E-commerce | Next.js, React, Django, PostgreSQL

- Migrated the project from HTML/CSS/JavaScript and Supabase to a Next.js frontend and Django/PostgreSQL backend.
- Implemented user registration and sign-in, a product catalog with variants, and checkout via WhatsApp or bank transfer.

RoadLedger | ELD/HOS Trip Planner Prototype | Django/DRF, React, MapLibre, OSRM

- Built a trip planner with routes, rest breaks, stops, and printable daily logs.
- Integrated geocoding and routing services, implemented HOS 70/8 rules, and deployed the prototype on Render.
