PROFESSIONAL PROFILE

Junior Full Stack Developer with a backend focus. I work with Django REST Framework, PostgreSQL, and Next.js. I focus on the parts that must remain reliable: company-level data isolation, role-based permissions, and concurrency-safe billing and inventory, supported by automated tests and CI. Seeking my first position on a development team.

TECHNICAL SKILLS

Frontend: JavaScript, TypeScript, React, Next.js
Backend & Data: Python, Django, Node.js, SQL, Django ORM, Web APIs
Testing & Tools: Playwright, Django tests, Selenium, Git, GitHub, GitHub Actions, CI/CD, Docker

FEATURED PROJECTS

Fracxion · Multi-Company Business Management

Sep 2026 – Oct 2026 · Personal project · github.com/nelsonvis3/fracxion-facturador

- Built customer, catalog, invoicing, payment collection, purchasing, and inventory modules with company-level data isolation and five role-based permission levels.
- Used PostgreSQL transactions and row-level locking to keep invoice numbers and balances consistent under concurrent requests.
- 367 backend tests (92% coverage) and 53 Playwright scenarios, run in GitHub Actions.

Ragnar Suplementos · Online Store

Aug 2026 – Sep 2026 · Project for a local business · github.com/nelsonvis3/ragnarsuplementosfsa

- Built the storefront and an owner-facing admin dashboard (catalog, bundles, stock, orders) using Next.js and a Django REST Framework API that validates pricing and inventory.
- Prevented overselling through row-level stock locking, including bundles that share inventory with individual products, and protected checkout against duplicate requests.
- Integrated Mercado Pago with server-side payment confirmation and prepared a demo using Docker Compose and Nginx on Ubuntu Server. 106 backend tests.

SPACE Tasks · Open-Source Productivity App

Oct 2026 · Personal project · github.com/nelsonvis3/space-tasks · Live demo: nelsonvis3.github.io/space-tasks

- Built a task manager, calendar, and PDF reader with React, TypeScript, and Node.js (embedded SQLite), released as a web demo and an Electron-based Linux AppImage.
- Implemented accounts with scrypt, CSRF protection, and rate-limited authentication, as well as on-device AI, OCR, and translation.
- 87 unit and Playwright tests across Chromium and Firefox, run in GitHub Actions.

EDUCATION & CERTIFICATIONS

CS50's Web Programming with Python and JavaScript — HarvardX / edX · Sep 2026 – Present
High School Diploma — E.P.E.P. No. 179, Formosa · 2023
